

Data Protection Impact Assessment (DPIA) Summary

DPIA014 - Stage 2 Summary

Date Reviewed: 06/12/2024

Service Area/Team:

Fleet and Estates

Project name/title for work:

Vehicle CCTV

SUMMARY OF PROJECT:

Humberside fire and rescue service have 360-degree cctv installed on fire engines. This helps us to review activities around these vehicles when needed. This CCTV may capture images of the public as well as staff.

CCTV on our fire engines helps with the following:

- It improves the security of our fire engines.
- It prevents criminal activity and threatening behaviour towards staff.
- It assists with internal and external investigations and monitors safe systems of work.

Assurances:

- Staff are only given access to what they need which is controlled by the system manager.
- We carry out system checks to make sure that equipment is working correctly.
- Staff are trained how to use the system and must read the code of practice.
- We only share data if it has been approved.
- Images are only downloaded and viewed when required.
- The system has the functionality to redact images.
- Footage and images are stored in the evidence locker for 30 days unless marked as otherwise.
- Vehicles have signs telling people that recording is taking place.
- We publish Privacy Notices on our website explaining how and why the images are recorded.
